

Bring Your Own Device Recommendations 2017

Dear Parents, technology has become part of everyday school life for our students. We encourage each student to bring a suitable device to school if possible. As a minimum requirement the device must have Wifi and be compatible with Google Docs.

If you do not already have a device at home, a Chromebook is a suitable tool, particularly for students in Years 7-10. Other suitable devices include tablets and laptops.

Papamoa College has formed a partnership with Noel Leeming. They have supported us throughout this process and continue to offer special pricing. Let them know that you are from Papamoa College when making a purchase.

For senior students with subject specific requirements a more detailed information sheet will be available when subject selections are confirmed. For the majority of students a Chromebook or similar will suffice.

Why we recommend a Chromebook for school

For peace of mind

Chromebooks are automatically kept up to date, so you'll always have the latest virus protection, along with the latest features like Voice Search. Best of all, your Chromebook won't slow down over time. No setup needed, just log in with your Google account. No long load times, just flip it open and get busy doing anything other than waiting. And with a long-life battery, you can leave your charger at home.

For picking up where you left off

Chromebooks stay synced with your Android phones & tablets, and everywhere you're signed in with your Google account - so your stuff stays with you, even when your laptop doesn't.

For sharing easily

Switching between accounts is a snap, so you can easily share your Chromebook without anyone else messing with your stuff.
