

Bring Your Own Device (BYOD)

Purchasing a digital device is highly recommended. To help with this here are a few considerations:

A suitable device should meet the following criteria (a basic Chromebook is ideal):

- Wireless networking capability (WiFi)
- At least 5 hours of use from one battery charge
- Reasonable size screen (10" minimum)
- Has a keyboard (can be detachable)
- The ability to run a web browser (e.g. Chrome) that will allow access Google Classroom and other online learning resources
- Is lightweight, but robust enough to handle daily use
- Is in a protective carrying case

Other considerations which we strongly recommend:

- Warranty - students using the device regularly will want faults fixed quickly and the school can not provide technical support or repair services.
- Insurance - make sure you are covered for replacement if the device is lost, stolen or if insurance does not cover personal property.
